Kim Franklin

Senior Healthcare Data Analyst | Claims & Utilization Reporting |
SAS, SQL, Power BI | TRICARE | Data-Driven Strategy | Health Net
Federal Services - Centene

Leesburg, Virginia, United States

Summary

I'm a Senior Healthcare Analyst with over a decade of experience turning complex data into clear, actionable insights that drive smarter decisions in healthcare operations, network optimization, and population health. Whether it's digging into claims data, identifying cost drivers, or building predictive models, I'm passionate about using data to make healthcare better, more efficient, and more equitable.

I specialize in:

- * Translating messy datasets into meaningful stories using SAS, SQL, Python, and Power BI
- * Leading high-impact analytics projects that influence strategic planning and policy
- * Supporting cross-functional teams with data-informed recommendations that align with real business goals

Throughout my career, I've helped large healthcare organizations and federal programs (like TRICARE) improve provider network efficiency, track utilization trends, and reduce reporting bottlenecks through automation and scalable analytics solutions. I also enjoy mentoring analysts and collaborating with stakeholders to move initiatives from data to decision.

If you're working on solving healthcare challenges with data—or looking for someone who can bridge the gap between technical analysis and business strategy—I'd love to connect.

Experience

Health Net Federal Services

19 years 4 months

Senior Healthcare Analyst

September 2014 - January 2025 (10 years 5 months)

Arlington, Virginia, United States

Developed and delivered ad hoc reports for both internal and external clients, meeting tight deadlines while maintaining high accuracy.

Utilized SAS, SQL, Business Objects and other data tools to analyze large datasets, identify trends, generate complex ad hoc reports, and provide data-driven solutions.

Led intricate research projects on the Autism Care Demonstration program and healthcare claims data, uncovering key trends that improved decision-making processes by enabling evidence-based strategies.

Built and maintained forecasting models to support network sizing and optimization of the TRICARE West Region provider network, ensuring beneficiaries had consistent, reliable access to care.

Developed reports, graphs, and visualizations to monitor key metrics, including cost, utilization, variance, and trend analysis.

Automated reporting processes, improving efficiency and productivity by reducing manual efforts.

Healthcare Analyst

August 2010 - September 2014 (4 years 2 months)

Arlington, Virginia, United States

Developed dynamic data visualizations to deliver actionable insights to clients and leadership, driving strategic initiatives.

Conducted comprehensive analyses of healthcare data to drive data-informed decision-making, supporting the delivery of cost-effective, quality healthcare.

Developed and maintained models, HEDIS reports, CDRLs, and ad hoc reports to track and analyze key performance indicators (PKIs) and utilization metrics across claims, referrals, enrollment, and access to care.

Managed TRICARE National Capital Market as the primary point contact, delivering exceptional technical support and tailored data solutions to clients.

Collaborated with cross-functional teams to ensure data accuracy and alignment with business requirements gathering and testing for high-impact analyses.

Led and facilitated both leader-led and web-based training sessions for military clients, equipping them with the knowledge to effectively navigate Health Net Warehouses and Marts.

Administrative Assistant III

October 2005 - August 2010 (4 years 11 months)

Arlington, Virginia, United States

Delivered confidential administrative management for multi-range behavioral health (non-clinical) services offered to military members and their families.

18th Services Marketing Kadena Air Force Base

Marketing Account Specialist

April 2000 - May 2005 (5 years 2 months)

Okinawa, Japan

Education

University of Maryland Global Campus

Bachelor's degree, Business Administration

Strayer University

Diploma of Education, Computer Information Systems
